

Mattermost vs. GovSlack

Find out why government organizations around the world trust Mattermost for secure, effective communication and coordination.

Accelerate decision advantage with a secure digital command hub

Traditional communication tools can fall short of the fast-moving, dynamic needs of high-stakes government collaboration, leaving teams without critical context or at risk for security vulnerabilities. Mattermost brings together your people, tools, and processes into a single, secure command hub, enabling fast, context-driven decision-making.

Why government organizations choose Mattermost

Securely integrate internal personnel, workflows, and data

Collaborate across network and security boundaries with a common-use communication platform that can deploy to public cloud, private networks as well as air-

A secure alternative for remote communication

Maintain fast, reliable communications while switching from personal messaging apps usage to mobile communication platform managed by IT, reducing compliance and

Increase cross-group collaboration and effectiveness

Work with stakeholders across organizations with interoperable communications across Mattermost and Microsoft Teams.

Mattermost vs. GovSlack Platform Comparison

Learn why government organizations prefer Mattermost for mission-critical workflows and collaboration.

	Mattermost	Slack
Deployment Options	Deploy in public, private, and air-gapped networks On-premises for classified operations and air-gapped environments with full data custody. Your self-sovereign hub can be deployed on: - Any 64-bit Linux system from a tarball - A virtual machine - A Kubernetes cluster using the Mattermost Kubernetes Operator Cloud-neutral (public, private, or air-gapped) Trusted managed service provider, and/or systems integration partner (Platform One, Contegix TrustStack, Velocity Kinetic)	GovSlack runs on slack-gov.com rather than the slack.com domain.
Impact Levels	Mattermost is running at DoD IL4, IL6, and IL6+ in many environments.	GovSlack is pursuing DoD SRG IL4
Pricing	The features in Mattermost Enterprise are unlimited and more cost-effective than the more expensive GovSlack Grid Plan.	GovSlack Business+ lacks many Mattermost Enterprise features and is restricted to 1 workspace/instance for the same price.
Active Directory	Yes	Yes , but requires an Enterprise Grid plan.
Data ownership	100% full data control and independence from shared infrastructure.	Slack owns all data; you have to trust their security rather than employ your own.
AI	Connect Mattermost Copilot to local (self-hosted) and third-party (vendor-hosted) LLMs of your choice.	Slack AI is available as an add-on for Enterprise plans.
Workflow	Unlimited collaborative Playbooks usage with Mattermost Enterprise.	Limit of 1,000 runs/month on premium workflows. Workflow Builder is not available in GovSlack workspaces.
Integration into	With the Mattermost plugin framework, you can integrate your instance with any cloud-based, on-premises, or legacy application within air-gapped environments.	Only apps submitted to the GovSlack App Directory are available for installation in GovSlack workspaces.
